

# COMMENCEMENT OF DETAIL DESIGN

## Highway 69 Four-Laning

### From Highway 529 northerly 15 km

#### G.W.P. 5076-06-00

### THE PROJECT

The Ministry of Transportation has retained MMM Group to undertake the Detail Design for the four-laning of Highway 69 from 0.6 km south of the south junction of Highway 529 northerly 15 km.

The preferred alignment for this section of Highway 69 was previously identified and documented in the Route Planning and Environmental Assessment Report, dated December 2006.

### DETAIL DESIGN

Under the Class Environmental Assessment for Provincial Transportation Facilities (2000) this project is identified as a 'Group B' project. The work will include:

- Four-laning of Highway 69 with a combination of twinning and new alignment sections
- A new interchange at Harris Lake Road, complete with associated service roads
- New structures over the Harris River and Naiscoot Lake
- Replacement of the existing Naiscoot Lake bridge
- A linkage access across the highway between Naiscoot Lake Road and Moose Lake Road
- Modification to the rest area at Harris River

### PUBLIC INVOLVEMENT

This study is following an approved planning process with the opportunity for public input. Public Information Centres (PIC) will be scheduled later in the project to present details for public review and comment. The PIC will be advertised in this newspaper at that time.

A Design and Construction Report (DCR) will be prepared for each of the main contracts (currently 3 main contracts are proposed). The documents will be made available for a 30-day public review period with public notice advising of the start of the review period.

### HOW TO GET MORE INFORMATION

We are interested in hearing your comments regarding the study. With the exception of personal information, all comments will become part of the public record in accordance with the Freedom of Information and Protection of Privacy Act.

A project website link at [www.highway69.ca](http://www.highway69.ca) will provide updated project information during Detail Design.
